

INTRODUCING...

Latitude Glass with Summit Technology

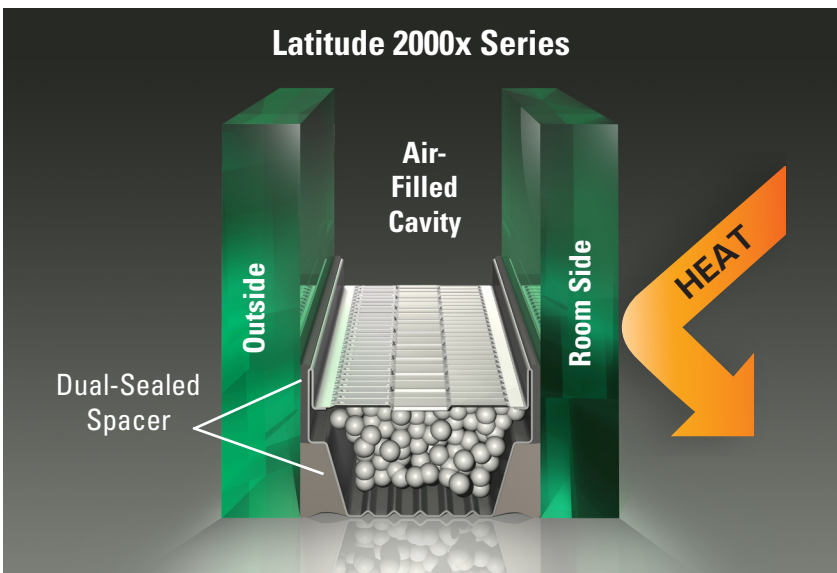

REACHING NEW HEIGHTS IN BEAUTY AND PERFORMANCE

Latitude Glass with Summit Technology is designed for high altitude performance, combining a clear view with reliable energy efficiency. The low-e coating, similar to what is used on premium cell phones and tablets, is scratch resistant, long lasting and reflects your home's heat back into the room.

Unlike glass packages manufactured at lower elevations and installed at altitude, Latitude Glass with Summit Technology delivers superior thermal performance using air-filled cavities and innovative glass coatings. This combination outperforms conventional argon filled windows to keep your home comfortable at any temperature.

- Exceeds current and 2015 ENERGY STAR standards.
- Reliable, warmer, dual-sealed spacer.
- Consistent, long lasting comfort and performance.
- Lifetime warranty covers the entire window - including the glass!

Reliable Energy Saving Technology

Outside Pane

- Blocks heat out in the summer
- Keeps warmth in during the winter
- Available with three Low-E options to meet your needs

Room Side Pane

- Reflects furnace heat back into your home, saving you money
- Easy to clean
- Durable and scratch resistant

Lasting Comfort & Performance

With the innovative Latitude Glass package, you can be confident that your new windows are a wise investment now and for years to come.

INTRODUCING...

Latitude Glass with Summit Technology

REACHING NEW HEIGHTS IN BEAUTY AND PERFORMANCE

Increase Performance with Triple Pane Protection

Latitude Glass packages are also available in triple pane to allow for even better performance and energy savings. Ask your Sunrise Representative how adding the protection of triple pane can save you money on energy bills.
